

PRODUCT OVERVIEW

- Eliminates paper from the export process.
- Intuitive, easily mastered user interface enables quick selection of document types to extract from the repository for export
- Loan export process shortened from weeks or months to hours or days
- All document images are assembled in the precise order and required format
- Entire package is delivered on a series of CDs or digital tape cartridge instead of a truckload of paper documents
- Significant cost savings
- Fast installation and rapid ROI

PYRAMID LOAN EXPEDITOR

LOAN EXPORT:

Dramatically more efficient loan export to secondary market or third party vendors.

For many mortgage lenders, the single most arduous, time consuming, inefficient and labor-intensive part of the loan process is the final step: export. Packaging and exporting bulk loan packages for sale to the secondary market or transfer to third party service organizations often consumes weeks or months of effort. Large teams of employees must locate, organize, sort, tab, package, palletize and prepare these documents for shipment via tractor trailer. At their destination, the process begins in reverse.

WHAT IS PLX?

Pyramid Loan eXpeditor™ (PLX) is a Business Process Management solution that dramatically changes this picture. Built on a foundation of FileNet's powerful Enterprise Content Management (ECM) architecture, Pyramid Loan eXpeditor is a mortgage processing solution that adds power and intelligence to your existing host-based and point solutions. Available in three modules, PLX orchestrates, streamlines and accelerates mortgage underwriting, post-close processing and performs electronic export of loan packages.

EXPEDITING LOAN EXPORT

PLX Loan Export enables vendors to deliver loan packages to secondary market investors or thirdparty service organization on magnetic tape or a series of CDs. With minimal personnel, and in hours not weeks, the process is complete. PLX Loan Export is designed to build a complete, customized, export package utilizing a list of loan numbers provided in virtually any format. PLX provides exceptional value to lenders by enabling replacement of the gargantuan traditional loan export process with one vastly more efficient, expeditious and inexpensive.

PLX Loan Export enables simple selection and ordering of required documents
